

CCR2 Human Monoclonal Antibody, Fc-silenced with no ADCC and CDC Activity

SKU: EAB-029

Recombinant human monoclonal antibody (Clone ID: 5B11), expressed in Chinese Hamster Ovary cells (CHO), is capable of strong binding to Chemokine (C-C motif) receptor 2 (CCR2).

CCR2, a chemokine receptor, is a regulator of monocyte/macrophage trafficking and is upregulated in response to inflammation. Our CCR2 monoclonal antibody is developed from phage display technologies. This antibody has been extensively tested for its accuracy and reliability: specifically recognizes human CCR2.

species reactivity	human
recombinant	expressed in Chinese Hamster Ovary cells (CHO).
applications	ELISA, WB, IHC, Flow Cyt
antibody form	affinity purified immunoglobulin
immunogen	human CCR2 extracellular domain
clone	5B11
purity	>95% (SDS-PAGE)
form	0.015 M PBS, 0.05% NaN ₃ , pH7.2
concentration	~ 2 mg/ml
isotype	human IgG1, k
Fc-engineered	Fc-silenced, no ADCC and CDC

- Store at -20°C. Recombinant monoclonal antibodies are guaranteed stable for 12 months when properly stored.
